Mr. Katsuya Nakanishi, Representative Director, President and Chief Executive Officer, Mitsubishi Corporation

Request for Consultation with Adversely Affected Communities and Ensuring Effective Remedy Regarding the Donggi-Senoro LNG Project in Central Sulawesi, Indonesia

In our letter dated June 24, 2026, we pointed out the impacts that the Donggi-Senoro LNG Project (DSLNG) has caused over more than a decade to the livelihoods and health of local communities. At the same time, we emphasized the necessity of developing, implementing, and monitoring effective measures (including appropriate and adequate compensation for all affected local communities) in a transparent manner to these problems are resolved. The prolonged harm suffered by local communities is nothing short of a human rights violation, and "access to remedy" must be guaranteed based on the "corporate responsibility to respect human rights" set forth in the United Nations Guiding Principles on Business and Human Rights (UNGPs).

We hereby present the following two specific requests to your Company, which explicitly commits to "Support and respect for international norms " such as the UNGPs in its Human Rights Policy¹:

(1) To promptly establish opportunities for consultation with affected fishing and farming communities, in order to thoroughly understand and assess the severe impacts suffered over the past decade, as well as the remedies required by these communities.

(2) Based on the said consultations, to exercise all possible outreach to PT Donggi-Senoro LNG (PT DSLNG) to ensure effective remedy and problem-solving measures.

If your Company currently recognizes that there are no particular issues regarding environmental and social considerations related to DSLNG, we must say that your human rights and environmental due diligence (DD) and monitoring are extremely inadequate. We are gravely concerned about the possibility that your Company has relied primarily on reports from PT DSLNG, failing to conduct independent and proper verifications and scrutinies without the involvement of PT DSLNG.

We believe that your Company's prolonged failure to grasp the reality of the harm suffered by local communities stems from nothing less than fundamental flaws in your own practice to implement the principles of "corporate responsibility to respect human rights" and "access to remedy" required by the UNGPs. As the largest investor in this project, your Company's responsibility is exceptionally heavier than that of other stakeholders, and you are in a position where you should play a more proactive role and demonstrate accountability in respecting the human rights of local communities and ensuring access to remedy.

¹ <https://www.mitsubishicorp.com/jp/en/sustainability/social/humanrights/001.html>

Therefore, we strongly demand that your Company fulfill its responsibility by first establishing opportunities for direct consultation with local communities as stated in (1) above, and by demonstrating the utmost sincerity and commitment toward ensuring effective remedies in line with (2). Your Company explains that "it is not in a position to independently conduct explanations or exchanges of views regarding operational responses on-site from the perspective of ensuring consistency in information dissemination." However, if that is the case, your Company should take the initiative to arrange a consultative platform where PT DSLNG is also present.

Finally, regarding the new gas-related projects being planned and promoted in the vicinity of DSLNG, we emphasize that even if opportunities arise to invest in such projects, your Company must refrain from making any investments until the existing issues surrounding DSLNG are fully resolved.

Sincerely,

SIGNATORIES:
